Scoping an FDE Project: Phase Infographics

Oct 3, 2026 · @Sourav Banerjee

Module 1: Understand the request

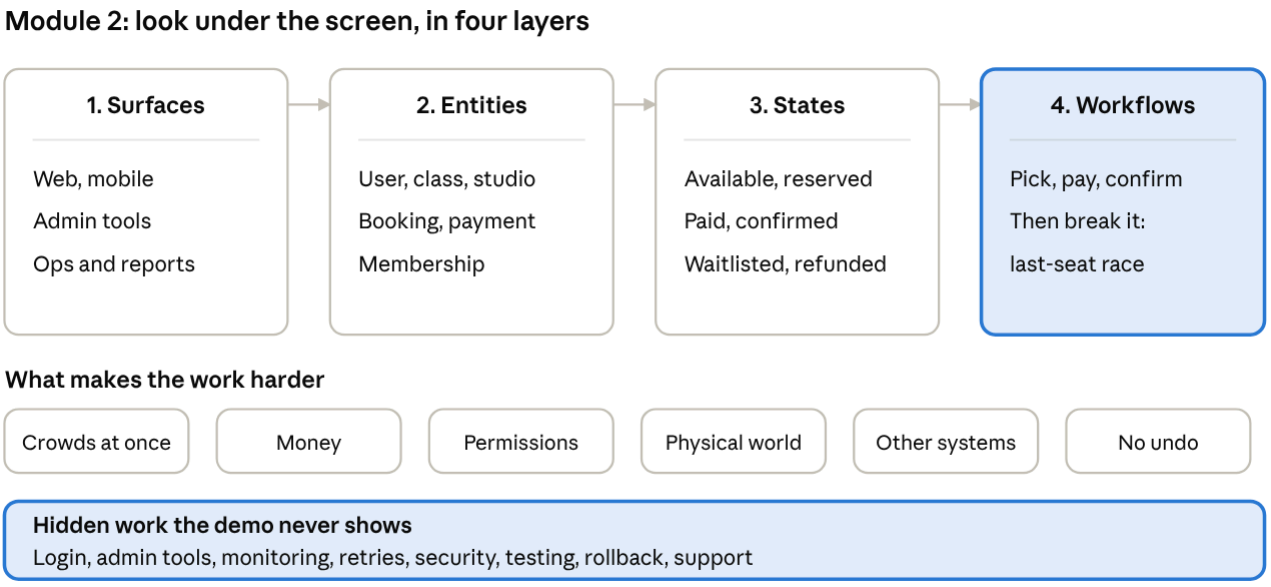

Turn a vague wish into a measurable goal and agree what "done" means before anyone names a date.

Module 1 infographic

Module 2: Figure out what you are really building

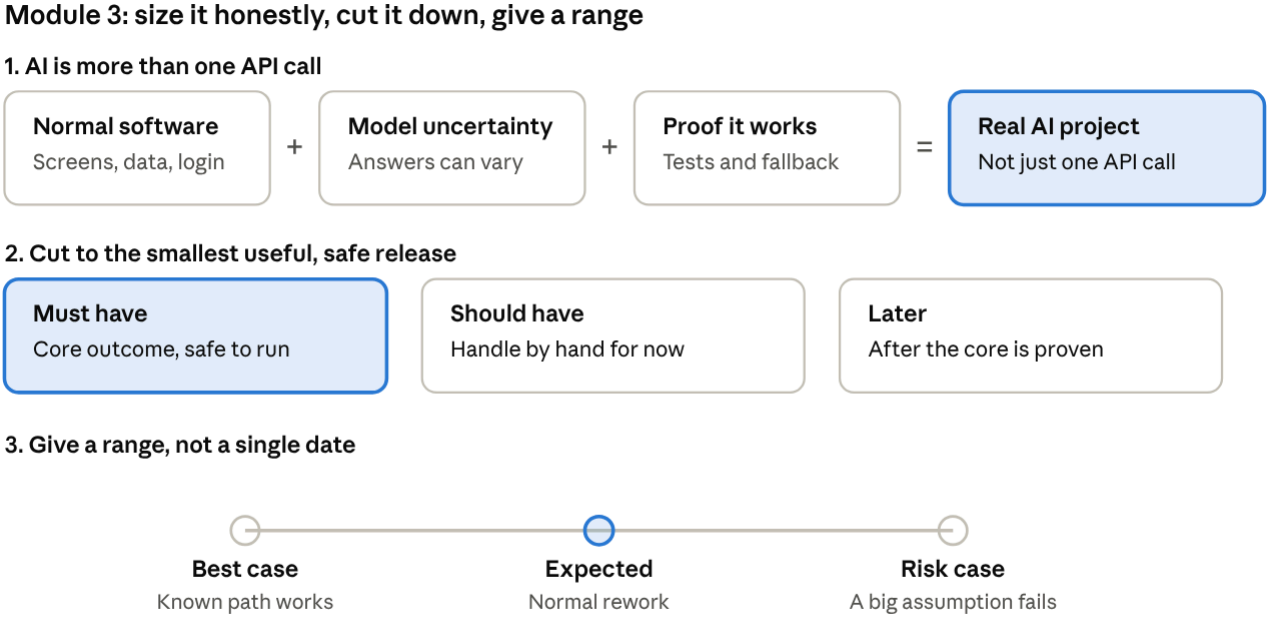

Look under the screen at surfaces, entities, states and workflows, because that is where the real effort hides.

Module 2 infographic

Module 3: Estimate honestly and shrink to a first release

Size AI work as a product, cut to the smallest useful release, and give a range instead of one date.

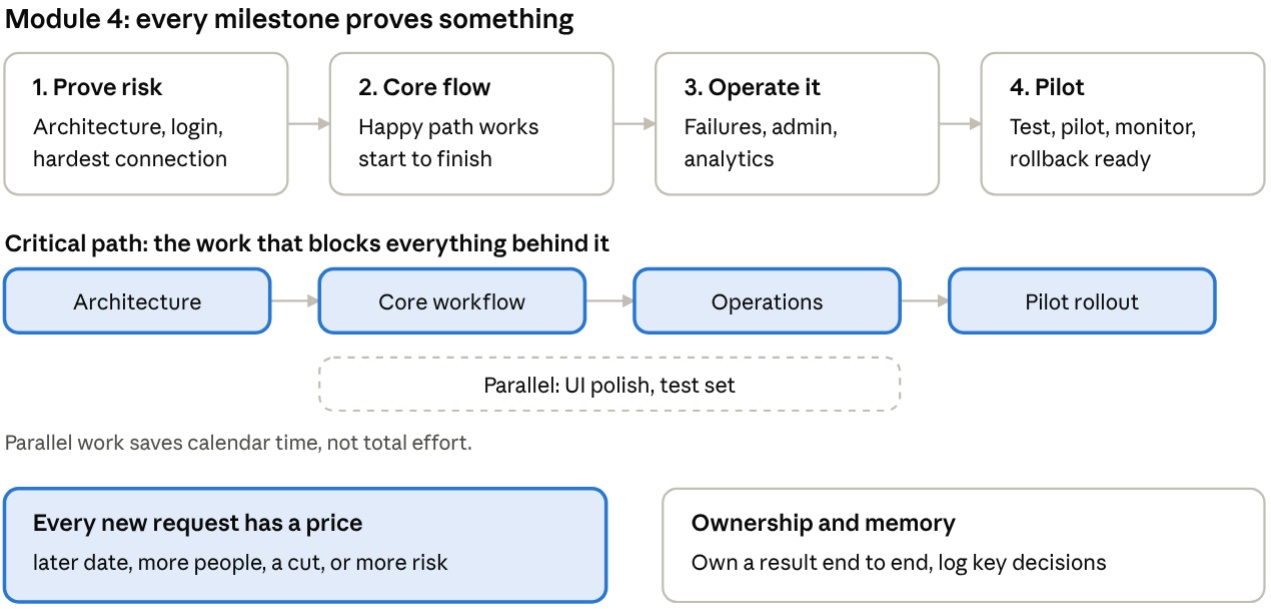

Example: three to five weeks, with named assumptions. Re-estimate when the facts change.

Module 3 infographic

Module 4: Turn the estimate into a build plan

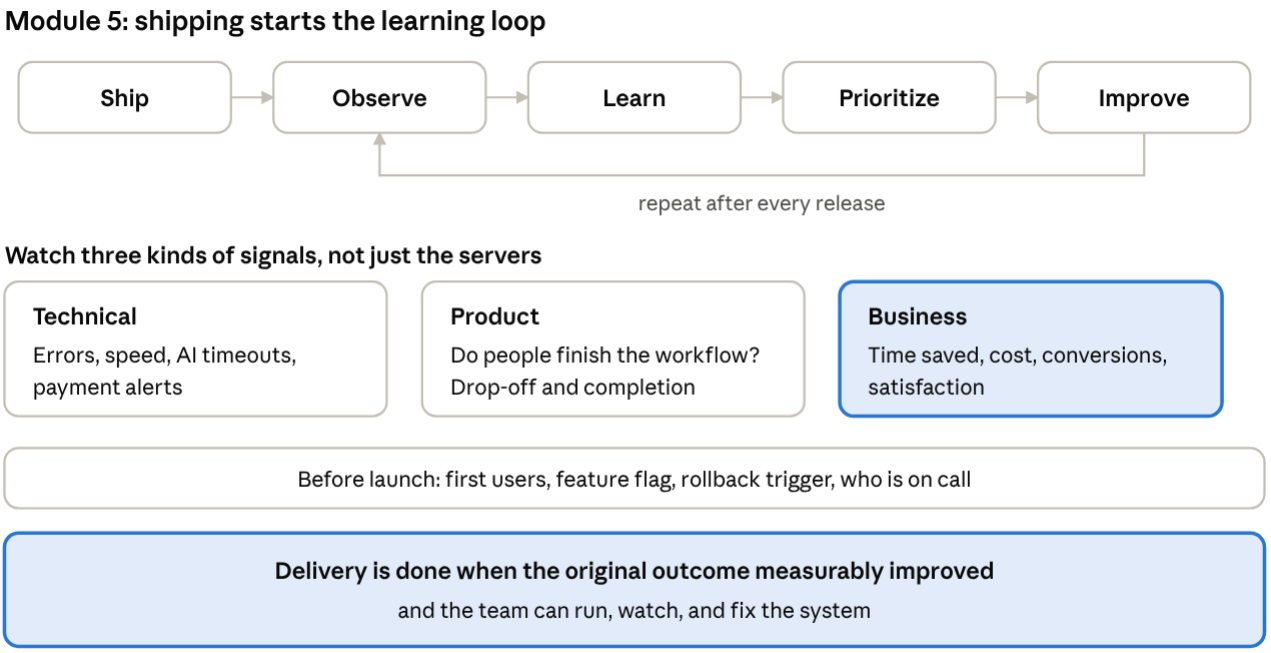

Plan milestones that prove something, protect the critical path, and make every scope change visible.

Module 4 infographic

Module 5: Roll out, operate, and prove the result

Shipping is the start of the learning loop; delivery is done only when real evidence shows the outcome improved.
